Subject: Enterplicity CON

Mr. Bradford,

Recommend approval with your digital signature the issuance of a Certificate of Networthiness, (CoN) for Enterplicity, version 6.0. This is a Commercial off the Shelf (COTS) product of Team Interactions, Inc.

The Information Systems Engineering Command (ISEC), Fort Huachuca, AZ has requested this CoN. Once approved, this application will be added to the Valid CoN List and posted on the Army Knowledge Online (AKO).

FOR OFFICIAL USE ONLY

Certificate of Networkiness: Enterplicity version 6.0

Approved: 1 April 2008

Enterplicity is a mid-size, web-based project management tool. It provides the capabilities of a full project management system. It enables organizations to centralize and manage project information centrally by using a standard web browser. Enterplicity expands on the features of the standard edition of Microsoft Project by providing a web-based organizational repository.

This CoN is valid only for the duration of the current version. This recommendation is based on the ability to securely configure software to comply with all Army and Department of Defense guidelines. Any changes that alter the security posture or configuration may invalidate this certificate. This CoN does not grant inherent Networkiness status to any other necessary secondary applications, all of which must be licensed and supported under a licensed and vendor supported contract.

The NETCOM POC is Ms. Kathy Laymon, 520-538-0295, e-mail:
kathy.laymon@us.army.mil.

Classification: UNCLASSIFIED

Caveats: NONE
